IMPORTANT: Please read the following.
EAB has prepared this report for the exclusive use of its members. Each member acknowledges and agrees that this report and the information contained herein (collectively, the "Report") are confidential and proprietary to EAB. By accepting delivery of this Report, each member agrees to abide by the terms as stated herein, including the following:
1. All right, title, and interest in and to this Report is owned by an EAB Organization. Except as stated herein, no right, license, permission, or interest of any kind in this Report is intended to be given, transferred to, or acquired by a member. Each member is authorized to use this Report only to the extent expressly authorized herein.
2. Each member shall not sell, license, republish, distribute, or post online or otherwise this Report, in part or in whole. Each member shall not disseminate or permit the use of, and shall take reasonable precautions to prevent such dissemination or use of, this Report by (a) any of its employees and agents (except as stated below), or (b) any third party.
3. Each member may make this Report available solely to those of its employees and agents who (a) are registered for the workshop or membership program of which this Report is a part, (b) require access to this Report in order to learn from the information described herein, and (c) agree not to disclose this Report to other employees or agents or any third party. Each member shall use, and shall ensure that its employees and agents use, this Report for its internal use only. Each member may make a limited number of copies, solely as adequate for use by its employees and agents in accordance with the terms herein.
4. Each member shall not remove from this Report any confidential markings, copyright notices, and/or other similar indicia herein.
5. Each member is responsible for any breach of its obligations as stated herein by any of its employees or agents.
6. If a member is unwilling to abide by any of the foregoing obligations, then such member shall promptly return this Report and all copies thereof to EAB.
About Our Work

About EAB

At EAB, our mission is to make education smarter. We harness the collective power of more than 1,200 educational institutions to uncover and apply proven practices and game-changing insights.

And since complex problems require multifaceted solutions, we work with each school differently to apply these insights through a customized blend of research, technology, and services.

Who We Serve

From kindergarten to college and beyond, EAB partners with education leaders, practitioners, and staff to accelerate progress and drive results in four strategic areas: enrollment management, student success, graduate program growth, and resource optimization.

We are honored to work with the most progressive colleges, universities, community colleges, K-12 districts, independent schools, and graduate programs in the country.

The Equity Challenge: Identifying Scalable Solutions

Each year, EAB’s researchers poll our community college members to ask: “What issues in higher education keep you up at night?” Topics related to student success always top the list, but this year we observed something noteworthy. The issue of equity has risen to the top across multiple surveys administered by EAB. “Closing the achievement gap in critical populations” was ranked as one of the top three greatest concerns among college presidents.

Over the past two decades, colleges have enrolled a greater percentage of disadvantaged students, but these students are not graduating at rates comparable to those of their peers. Worse, they are leaving our colleges with debt and no credential to show for their effort.

While the social imperative is clear, even the most pragmatic college administrator knows the importance of graduating more students. With current college enrollment declines across most of the country, ”risk sharing” proposals under consideration in the reauthorization of the Higher Education Act, and performance-based funding models affecting colleges in 35 states, the current climate demands aggressive action to support student success.

EAB has responded to this call to action. The purpose of this white paper is to explain why we need to focus more on part-time students to close the achievement gap in community colleges. A comprehensive, best practices study to identify the most effective strategies for advancing part-time student success and closing long-standing achievement gaps will be released from the Community College Executive Forum later this year.

Historically Underrepresented Populations Are on the Rise

Students from historically underrepresented populations bring diverse experiences.

College access has been a primary concern of higher education leaders for nearly two decades. These efforts have paid off. Historically underrepresented populations are increasing on campus. We have made slight progress in narrowing the college access gap between white and black students and significant progress in the gap between Hispanic and white student enrollment. We also see low-income students enrolling at higher rates than their wealthier peers.

Underrepresented minorities (URM) are more likely than white students to attend community colleges, and that has resulted in campuses becoming majority nonwhite for the first time in history. Diversity is further enhanced by students’ backgrounds. Many students are the first in their families to attend college, most seek financial aid, some are military-affiliated, others have disclosed disabilities, most work, and still others are single parents.

These students’ experiences enrich college classrooms, but there is a problem. Too few of them graduate.

Achievement gaps persist, even as access improves.

Improved access among historically underrepresented populations suggests future community college enrollment will be increasingly comprised of URM and economically disadvantaged students. Yet, there have been enduring achievement gaps between these students and their more advantaged peers.

Despite investments in student success, overall community college graduation rates have remained stubbornly flat.

In addition, outcomes among historically underrepresented students do not reflect the gains made in college access. In fact, degree attainment gaps between Hispanic and white students have remained virtually unchanged, and the gap between black and white students has actually increased slightly.

Low-income, first-generation students fare no better. While most start at two-year colleges intent on earning a degree, they are nearly four times more likely than their peers to leave college after their first year.

Increased diversity on campus demands progress on achieving equitable outcome for all students.

Historically Underrepresented Populations Struggle to Graduate

Earned Degree by Race/Ethnicity
25- to 29-Year-olds with an Associate Degree

![Graph showing degree attainment by race/ethnicity]

- 2000: 44% White, 26% Black, 15% Hispanic
- 2016: 54% White, 32% Black, 27% Hispanic

Attainment gap between black and white students has grown by 4 points

Low-income, first-generation students are

4X more likely to drop out after their first year as their peers without either risk factor

Graduation Rate Within 150%—Public 2-Year
By Starting Cohort Year

![Graph showing graduation rate]

Have We Been Looking at the Achievement Gap All Wrong?

Our part-time student population is comprised of some of our most vulnerable students.

We know that students who attend college full-time are more likely to graduate than part-time students. However, 60% of community college students enroll part-time and 83% will enroll part-time or stop out at least once before they graduate.

Although conventional wisdom suggests that equity is a separate issue from the success of part-time students, low-income, first-generation, and underrepresented minority students are all more likely than their more advantaged peers to attend college part-time at some point.

Part-time enrollment adversely affects graduation rates across all student populations and disproportionately affects completion among URM. For many of these students, life’s competing priorities ensure that attending full-time will never be a viable option.

To advance equitable outcomes, we need to support the part-time students who make up the majority of our student body.

Historically Underrepresented Populations Attend College Part-time

Closing the Achievement Gap Will Require a Shift in Focus

Target gaps between part-time student populations.

Because the proportion of underrepresented minority, low-income, and first-generation students is so high and they are more likely to attend part-time, student success initiatives that target full-time students will not close the achievement gap as effectively as focusing on part-time students.

EAB has projected how the overall achievement gap would change if URM graduated at the same rates as their white peers. If full-time black and Hispanic students graduated at the same rates as full-time white students, the overall achievement gap between black and white students would improve by 5 points, but the gap between Hispanic and white students would change by just 1 point. However, if we focus on closing the achievement gap among part-time student populations, the gap between black and white students would close by 13 points—or 62%—and the gap between Hispanic and white students would improve by 7 points—or 58%.

To reduce achievement gaps in a meaningful way, we need to engage students who have limited time on campus and address the institutional barriers that disproportionately affect part-time students.

Part-Time Student Success Has Significant Effect on Overall Achievement Gap

Achievement Gap Between White and Black Students and White and Hispanic Students

Projected changes if URM performed the same as white students

<table>
<thead>
<tr>

Clarifying the Matriculation Process

Unexplained Delays slow movement from step to step
Generic Information given to students with diverse needs
Confusing Terminology makes intake even more intimidating
Countless Transfers between departments to answer inquiries

“I can’t call off work just to be on hold and then told to go to a different campus for financial aid... If I could fix things over the phone or get told on the phone exactly what was needed I would be in classes right now.”
—Student survey response

Existing Onboarding Processes Hinder Part-Time Enrollment

Offer a clear route from application to enrollment.

Community colleges lose more than half of their applicants before the first day of class. The complexity of the onboarding process presents challenges, even for the most determined applicant. For part-time students, and especially those who are first-generation and low-income, the process can be overwhelming.

Students are often unaware of the necessary steps to complete enrollment, and since 70% of part-time students work more than 20 hours per week, time spent on campus is limited. Many students lose momentum as they face unexplained delays, generic information, confusing terminology, and transfers between college departments.

To successfully navigate these challenges, students—part-time students, in particular—need individualized guidance throughout matriculation, nudging them along as they move through each step of the onboarding process.

$72K Additional revenue earned from enrolling a greater proportion of the total applicant pool in fall 2017

Applied Practice:
Guided Onboarding

About: Pikes Peak Community College (Pikes Peak) serves approximately 20,000 students across three campuses. Only 20% of students matriculate directly from high school, and 25% have a military affiliation. In 2015, 60% of applicants were lost prior to the first day of classes.

Challenge: After discovering that 93% of non-enrolled applicants did not go on to enroll at another institution, college leadership decided to survey lost applicants. Student responses revealed numerous communication breakdowns, including long turnaround times, unclear messaging, and inflexible practices.

Solution: Once clear about the challenges that applicants were facing, Pikes Peak implemented Navigate to streamline their onboarding process. Key services, such as advising and placement testing, were also redesigned to be more applicant-friendly.
Academic Planning Tools Must Adapt to Part-Time Students

Academic planning tools need to be adaptable for use by part-time students.

In an effort to promote full-time enrollment, colleges often present academic plans in term-by-term formats designed for full-time students. These plans exclude information about requisite course combinations, which makes it difficult for part-time students to interpret essential sequences.

To further complicate matters, many students who exclusively attend college part-time have unrealistic expectations about how their pace will affect time to graduation. Yet, in many colleges, the only way students can confidently complete academic plans is by seeing their advisors—a challenge for students who can’t spend additional time on campus. Since part-time students comprise such a large proportion of the enrollment, information must be adaptable to their circumstances.

To solve this challenge, students need access to tools that reflect their competing priorities and part-time enrollment, allowing them to develop a right-fit academic plan that integrates critical information about academic requirements, requisite courses, and time to degree.

Part-Time Students’ Perception May Not Reflect Reality

<table>
<thead>
<tr>
<th>Perception</th>
<th>Reality</th>
</tr>
</thead>
<tbody>
<tr>
<td>Of part-time students believe they will graduate within 1-2 years</td>
<td>Of part-time students will graduate within 4 years</td>
</tr>
<tr>
<td>47%</td>
<td>8%</td>
</tr>
</tbody>
</table>

Inapplicable academic plans → Taking classes out of order → Hard to schedule classes around work

Applied Practice: Academic Planning

**About:** Part of the TSCG System, Wiregrass Georgia Technical College serves over 4,000 students on four campuses. In June 2016, Wiregrass joined the Student Success Collaborative, and in April 2017, they launched Navigate.

**Challenge:** Prior to 2017, students had minimal insight into the academic planning process and relied on ARC advisors to create an optimal class schedule. With long advising appointments, advisors did not have capacity during peak enrollment times.

**Solution:** Wiregrass partnered with EAB to implement a student success technology that would streamline the onboarding experience and reshape the advising appointment.

Provide Traditional Student Experiences in Nontraditional Formats

Deliver student-centric student experiences.

Competing priorities make it difficult for part-time students to benefit from the same experiences as traditional students. Evening classes often lack the same student support services, and part-time students often struggle to engage with peers, staff, or faculty on campus.

Technology can play an essential role in providing resources and engaging students who spend most of their time off campus. It provides an avenue for bringing the campus to the palms of students’ hands, providing a network of support to help students solve problems and seek help.

Staff can also proactively engage students through targeted outreach, informing them of support resources, events, or encouraging them to enroll. These campaigns foster engagement that is too often absent for part-time students.

Ensuring students can connect to campus staff and services provides holistic care that is especially important for part-time students, allowing them to stay on track academically and connect to the resources they need when problems arise.

Technology-Enabled Support Can Elevate Part-time Student Experiences

Applied Practice: Access to Student Resources

About: Trident Technical College (TTC) is a public associate college with a total enrollment of approximately 13,000 students.

Challenge: Based on student success data, TTC converted their course schedule to compressed 7-week mini-mesters. While pass rates were up, their advising model was increasingly strained due to high student demand and limited faculty availability.

Solution: TTC partnered with EAB Navigate to improve the student onboarding, including replacement of their face-to-face orientation with a virtual experience through Navigate MyPath. Their student-centric approach is improving in-class experiences while improving student satisfaction overall.

13% Improvement in course pass rates due to conversion from 14-week to 7-week terms

Source: EAB interviews and analysis.
Success among part-time students is essential to combat stalled adult enrollment and stagnating high school graduation rates.

Post-recession, the surge in adult learner enrollment fell sharply as adults reentered the workforce. Since 2013, adult learner enrollments across the two-year sector have continued to fall drastically.

Meanwhile, after decades of consistent growth, the number of high school graduates has begun to stagnate or even decline in many areas of the country. These shifts are especially pronounced in New England and the Midwest—areas dense with postsecondary options.

Many institutions already feel the double hit to enrollment. To combat its effects and better serve students of the future, colleges must ensure services are agile, student-centric, and forward-looking.

Community college students of tomorrow will be increasingly diverse. They will also maintain part-time enrollment, and they will need accessible support in order to successfully achieve their goals. Targeting resources to part-time students has never been more important to ensuring our colleges’ sustainability.

Our Work with Community Colleges

About the **Community College Executive Forum**

The **Community College Executive Forum** is a research membership designed to help the President and her cabinet develop and implement strategy related to the most pressing issues facing the sector. **The Forum focuses on growing enrollments, improving graduates’ employment and transfer outcomes, promoting student persistence, and managing the business side of the college.** CCEF serves the entire presidential cabinet and permits access to the entire EAB research canon.

- **Resource Library:** Any staff member can create an EAB.com account, which provides immediate and unlimited access to implementation toolkits, research studies, and webconferences.
- **Customized and Actionable Support:** Members have direct access to our dedicated team of experts for phone calls, private web-consultations, and ongoing support.
- **National Meetings:** These sessions provide college executives with an opportunity to hear our latest research, learn from EAB experts, and network with fellow members.
- **On-site Presentations:** Once each year, college executives can request that an EAB expert come to their campus and present a best practice study.

About **Navigate**

EAB’s **student success management system**, Navigate, is a comprehensive technology that links community college leaders, advisors, staff, and students in a **coordinated care network designed to give students clearer pathways and curated guidance from application to graduation.**

**Direct-to-Student Platform**

- **Guided Onboarding** provides custom enrollment steps individualized to each incoming student’s needs.
- **Smart Academic Planning** matches students to best-fit careers and relevant courses.
- **360° Advisor Dashboard** empowers frontline staff to meaningfully reach their student cohort.
- **Actionable Administrator View** gives leaders relevant data to serve students and report outcomes.

**Dedicating Consulting and Change Management**

- **Implementation Support:** Custom build teams
- **Strategy Formation:** Onsite Enrollment Pain Point Audit and Key Opportunities Report to improve student success
- **Ongoing Consulting:** Data Insights for Continuous Improvement
